- 10.DOOR HANDLE
- 11.DOOR FRAME

Technical Data

Model no.	WF-12SS
Capacity	33L
Voltage	220V
Current	1A(25℃)
Protection class	I
Climate class	SN;N
Input power	70W(25℃)
Power Consumption(KW.h/24h)	1.0(15℃)
Max Temperature Difference	> 15℃
Temperature Control Range	10-18℃
Net weight	12.0KG
Gross weight	13.0KG
Shape size(W×H×D)	34.0×46.8×51.0 CM
Packing size(W×H×D)	39.2×52.0×56.5 CM

Important Safety Instructions

⚡ WARNING ⚡

To reduce the risk of fire, electrical shock, or injury when using your appliance, follows these basic precautions;

- Read all instructions before using the wine refrigerator.
- **DANGER or WARNING:** risk of child entrapment.
- Junked or abandoned appliances are dangerous ...even if they “just sit in the garage a few days.”
- **Before you throw away your old wine refrigerator:** take of the door .leave the shelves in place so that children may not easily climb inside.
- Never allow children to operate, play with, or crawl inside the appliance.
- Never clean appliance parts with flammable fluids. The fumes can create a fire hazard or explosion.
- Do not store or use gasoline or any other flammable vapors and liquids in the vicinity of this or any other appliance. The fumes can create a fire hazard or explosion.
- Do not store food in wine refrigerator, as interior temperature may not get cool enough to prevent spoilage.

Installation Instructions

Before using your wine refrigerator

- Remove the exterior and interior packing
- Check to be sure the following parts are included:
 - ◆ One WF-12SS wine cooler.
 - ◆ Four metal out shelves.
 - ◆ One Instruction manual.
- Before connecting the appliance to the power source, let it stand upright for approximately 2 hours. This will reduce the possibility of a malfunction in the cooling system from handling during transportation.
- Clean the interior surface with lukewarm water using a soft cloth.
- Place your appliance on a floor that is strong enough to support the appliance when it is fully loaded. To level your appliance, adjust the front legs at the bottom of the appliance.
- Keep the appliance away from direct sunlight and sources of heat (stove, heater, radiator, etc.). Direct sunlight may affect the acrylic coating and heat sources may increase electrical consumption. Extreme cold or hot ambient temperatures may also cause the appliances not to perform properly.
- Not designed for placement in garage or basement. Designed for use inside the home.

Electrical Connection

Warning

Improper use of the grounded plug can result in the risk of electrical shock. If the power cord is damaged, have it replaced by an authorized Products service center.

This unit should be properly grounded for your safety. The power cord of this unit is equipped with a 3-pin plug which mates with 3-pin wall outlets to minimize the possibility of electrical shock. Do not under any circumstances cut or remove the ground wire from the power cord supplied.

Use of extension cords is not recommended.

This unit requires a standard 220V-50HZ electrical outlet with 3-pin plug.

The cord should be secured behind the wine refrigerator and not let exposed or dangling to prevent

accidental injury.

Operating Your Wine Refrigerator

It is recommended that you installed the wine refrigerator in a place where the ambient temperature is between 10-26 °C. If the ambient temperature is above or below recommended temperatures, the performance of the unit may be affected. For example, placing in extreme cold or hot conditions may cause interior temperature to fluctuate. The range of 10-16 °C may not be reached.

The temperature may fluctuate depending on whether or not the interior light is on or off or whether the bottles are located on the upper, middle or lower section.

How to use the press-buttons on the Display Panel:

You can set the temperature as your desire by pressing the button. There are three press-button on the panel “▲” and “▼” to adjust the temperature by 1 °C among 10-18 °C.

You can tune the interior light on or off by pressing the “**A**” button.

Care And Maintenance

Cleaning your wine refrigerator

- Unplug the wine refrigerator and remove the bottles.
- Wash the inside with a warm water and baking soda solution. The solution should be about 2 tablespoons of baking soda to a quart of water.
- The outside of wine refrigerator should be cleaned with mild detergent and warm water.
- Draw out the water box at the bottom, and wash.

Moving your wine refrigerator

- Remove all the bottles.
- Securely tape down all loose items inside your wine refrigerator.
- Turn the leveling legs up to the base to avoid damage.
- Tape the door.
- Be sure the wine refrigerator stays in the upright position during transportation.

Problems Disposal

You can solve many common wine refrigerator problems easily, saving you the cost of a possible service call. Try the suggestion below to see if you can solve the problem before calling the service center.

PROBLEM	POSSIBLE CAUSE
